Addition

Dear Valued Customers and Stakeholders,

With renewed enthusiasm and a clear strategic vision, we are excited to be **stepping into 25 Years of Service in the medical service industry**. Our dedication to serving you with compassion and excellence remains steadfast.

We extend our heartfelt gratitude to our loyal customers, whose trust and confidence in our products and services have propelled us forward. As we continue to provide high-quality medical, laboratory, and health equipment, biomedical waste management systems, and advanced hygiene solutions, we are committed to bringing you the best from leading multinational brands. Our aspiration to deliver world-class service and premium products drives us each day, motivating us to exceed expectations and set new standards in the industry.

As we look to the future, we seek your continued support, cooperation, and best wishes. In return, we promise to uphold our dedication to excellence, ensuring that you receive only the finest products and services in the days to come.

Ramindra Neupane

Hematology Instruments & Reagents

- Avantor™ manufactures and markets high-performance chemistries and materials around the world under several renowned brand names, including J.T.Baker®, Macron Fine Chemicals™, Rankerm® and BeneSphera™ brands.

3 Part Hematology Analyzer - H33s

H33s is a compact yet powerful, full featured 3-part hematology analyzer providing detailed flag information for:

- WBC (14 flags)
- RBC (6 flags)
- PLT (6 flags)

Features:

- 3-part differentiation of WBC, 19 parameters and 3 histograms
- Throughput: up to 70 samples per hour
- Large, full color LCD display
- Data storage of 35,000 samples with histogram
- Micro sampling of 9 µL
- Closed-tube sampling technology
- Automatic aperture zapping
- Priority **Support for Service & Application.**

21 Parameters:

WBC, Lymph#, Mid#, Gran#, Lymph%, Mid%, Gran%, RBC, HGB, HCT, MCV, MCH, MCHC, RDW-CV, RDW-SD, PLT, MPV, PDW, PCT, P-LCR, P-LCC

Parameter	Result	Unit
RBC	L 1.86	10 ¹² /L
HGB	L 67	g/L
HCT	L 0.193	
MCV	H 103.5	fL
MCH	H 35.8	pg
MCHC	346	g/L
RDW-CV	0.157	
RDW-SD	H 60.7	fL

Anemia

Parameter	Result	Unit
WBC	L 2.4	10 ⁹ /L
Lym#	L 0.7	10 ⁹ /L
Mid#	R 0.3	10 ⁹ /L
Gran#	RL 1.4	10 ⁹ /L
Lym%	0.305	
Mid%	R 0.130	
Gran%	R 0.565	

Leucopenia Lymph
Decreased Pancytopenia

Parameter	Result	Unit
PLT	L 38	10 ⁹ /L
MPV	H 12.6	fL
PDW	H 18.5	
PCT	L 0.48	mL/L
P-LCC	L 17	10 ⁹ /L
P-LCR	H 0.455

Fully Automated Biochemistry Analyzer - BA 200 (Bench-Top Model)

- Throughput of 200 t/h (clinical chemistry and turbidimetry reagents).
- Maximum throughput of 300 t/h with ISE Module: Na+, K+, Cl- and Li+ (Optional).
- High reagent and sample capacity (88 Positons).
- Dynamic baseline with SMART LED Technology.
- Photometric range up to 3.5 Abs and optical resolution of 0.0001 Abs.
- Full-capacity to integrate into LIS (ASTM, HL7).

BA 400

Fully Automated Biochemistry Analyzer (High Throughput Floor Standing Model)

- Throughput of 400 t/h (Clinical Chemistry and Turbidimetry).
- Maximum throughput of 560 t/h with ISE Module: Na+, K+, Cl-, Li+ (optional).
- Segmented Samples rotor for faster samples loading.
- Automatic haemolysis on whole blood samples.
- Dynamic baseline with SMART LED technology.
- Photometric range up to 3.5 Abs and optical resolution of 0.0001 Abs.
- Full-capacity to integrate into LIS (ASTM, HL7).

iMLD Fluorescence Microscope

- Trinocular Head & EWF 10 x 22 mm paired eyepiece.
- NeoLED 3W, Brightness Control.
- Fluorescence FITC Filters.
- Automatic Light Switch-off.
- High Speed Camera
 - sCMOS Sony Sensor
- High Speed USB 3.0 Connection.
- User Friendly Software.

IMMUNOFLUORESCENCE

iPRO Immunofluorescence Processor

- Adaptable Racks to 3 Sample Tube Types.
- 2 Dilution Trays of 96 Vials.
- 2 Slide Plates (16 Slides).
- On - board Automatic Barcode Reader.
- On - board Automatic DataMatrix reader.
- Needle with conductimetric level detector.

Blood Glucose Monitoring System

A1Care™ HbA1c & ACR Analyzer

- Small, easy to use whole blood POC diabetes monitoring system.
- All-in-one cartridge system with 12 months shelf life at room temperature.
- Does not require sample pretreatment or pipetting required.

HbA1c Testing

Features & Benefits

- HbA1c test results in 4 minutes 20 seconds
- Small blood sample size: 2.5 µL
- No sample pretreatment and pipetting required.
- NGSP & IFCC certified.

ACR Testing

Features & Benefits

- Fast & Accurate on-site inspection.
- Random urine test at any time.
- Good correlation to laboratory methods.
- 12 months cartridge shelf life at room temperature.

Immunoassay Analyzers

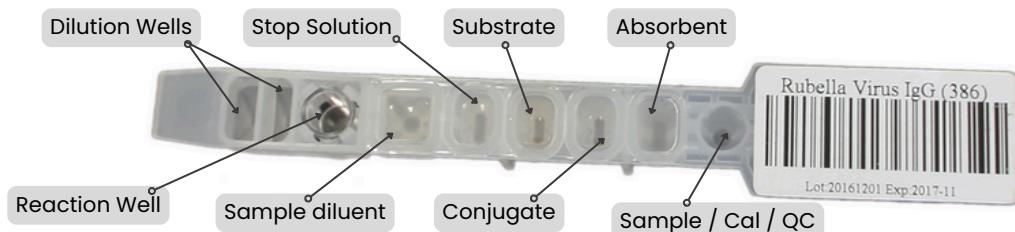

- NeoMedica focuses on making continuous improvements in key technologies, products and standards in the IVD field and are dedicated to providing innovative, smarter and safer, user-friendly solutions, thereby creating a better experience for users. With the experience of more than 20 years, NeoMedica have succeeded in becoming a worldwide recognisable brand and being associated with quality, integrity and excellence.

NAISSA®

NAISSA® – a Fully-automated **Monotest** Immunoanalyzer with an unique monotest reagent cartridge, state-of-the-art technology and outstanding flexibility.

- Less human effort
- Wide range of tests
- New tests constantly developed
- Flexible job list
- Rare and routine kits available on one platform

- **DiaSorin** is an Italian multinational Group and a global leader in the market for In-Vitro Diagnostics. DiaSorin is listed on the MTA (Automated Stock Market) in the FTSE Italia Mid Cap Index, organized and managed by Borsa Italiana S.p.A
- For **Over 50 Years** the Group has been developing, producing and commercializing diagnostic tests for a wide range of clinical areas. DiaSorin tests are designed for hospital and private testing laboratories, in the markets of immuno and molecular diagnostics.

High quality results and optimized throughput: LIAISON® XS improves your accuracy, precision, productivity and workflow

Reliable results with automatic processing:
LIAISON® XS ensures complete traceability to individual tubes and fewer opportunities for human error from manual processes

Best-in-class TB testing and screening: Enhance the performance of the state-of-the-art QIAGEN® QuantiFERON®-TB Gold Plus by virtually eliminating errors and test repeats

2-hour average walkaway: Enjoy lengthy walkaway times while LIAISON® XS autonomously runs up to 85 tests an hour*

Immunoassay Analyzers

- Drawray mainly engages in the R&D, production, sales and service of products in the field of diagnostics (IVD). It strictly follows the company's quality policy and has passed ISO 13485 and ISO 9001 system certifications.

iStar 500 MONO TEST CLIA

iStar 500 is a highly-automated Single-test analyzer based on chemiluminescent immunoassay (CLIA) technology. The compact and integrated design combined with highly sensitive CLIA technology makes it an ideal choice for emergency diagnosis or small to medium labs who are looking for high accuracy testing results.

Compact Design

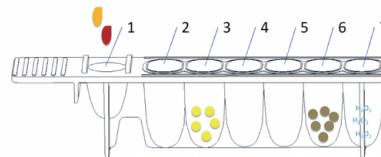

High Efficiency

Outstanding Flexibility

Accurate Results

- 1 - Manual Sampling Position
 3 - Acridinium-ester-labeled antigen/antibody conjugate
 6 - Magnetic particles coated with antigen/antibody
 7 - Pretrigger solution
 2,4,5 - Components Vary among Parameters.

iSTAR 2000

Chemiluminescence Immunoassay Analyzer

Features

High Automation & Flexibility

- Auto-mixing on Whole blood sample and automatic uncapping.
- Continuous waste cup cleaning with intelligent detection system.
- Barcode auto-scanning, 360° rotating scanning design.
- Ability to connect with Hematology Analyzer.

Optimum Productivity & Uniformity

- Test speed up to 200T/h, Up to 3 Instrument cascade.
- First test results in 9 mins.
- 25 sample position with independent emergency channel.
- On board cooling for 12 reagent position.

Compact design & Efficiency

- More test per square meter with 580T/m²/h.
- Small footprint, one machine only 0.345m².
- User-centered Design with simplified interactions.
- Easy-to-use software based on Windows System.

Outstanding performance & Confidence

- Acridinium ester chemiluminescence method.
- HCT detection system meets whole blood accurate test and avoid interference.
- Anti-contamination washing system and sampling systems, non-contact mixing.
- Complete liquid detection, bubble, empty aspiration and clotting detection.

- Eppendorf is a leading life science company that develops and sells instruments, consumables, and services for liquid-, sample-, and cell handling in laboratories worldwide. Its product range includes pipettes and automated pipetting systems, dispensers, centrifuges, mixers, spectrometers, and DNA amplification equipment as well as ultra-low temperature freezers, fermentors, bioreactors, CO₂ incubators, shakers, and cell manipulation systems.

Manual Liquid Handling

- Safe, Ergonomic & Light Mechanical Micro Pipette with Low Operating Forces.
- Electronic Air-cushion pipette with large variety of Applications.
- Multi-dispenser pipette for contamination-free dispensing of aqueous, viscous and volatile liquids.

Cold Storage

The Eppendorf -80°C Ultra Low Temperature (ULT) Freezers are one of the best energy-efficient freezers in the market. The vacuum insulation panel technology is the core: an advanced thermal insulation technology that significantly outperforms traditional materials such as closed-cell foams (urethane), foam beads, and fiber blankets.

PCR

PCR is routine and easy these days. However, it can be difficult when you want to do something that you've never done before! That's when you need high quality Eppendorf PCR cyclers and consumables to eliminate unwanted variables from your assays. All of our Mastercyclers have a special lid to avoid evaporation and superior block homogeneity to achieve consistent results, despite the well being used.

Temperature Control & Mixing

Mixing, heating, and/or cooling are mandatory steps within literally every protocol. Quite often, volumes and dimensions of tubes and vessels differ along the protocol. Routine applications may be limited to one or two functions and one vessel type – research work may require all three functions and a variety of vessel formats can be expected.

A simple dry block can fulfill some needs but for real science, you need more. The Eppendorf ThermoMixer C is our flagship – optimized for diversity in the lab. Your favored partner in sample preparation steps in the lab.

Laboratory Consumables

Eppendorf consumables are the result of over 50 years constant improvement and development. Due to the avoidance of any slip agents, plasticizers, and biocides during manufacturing, the risk of chemical leaching into the sample is minimized. The availability of different purity grades is tailored to the various requirements in laboratories.

Centrifugation

Eppendorf centrifuges are designed to go beyond speed and capacity to offer you unparalleled ergonomic operation and superior temperature management. With this sound foundation and our extensive experience, Eppendorf is proud to serve you as your expert partner in centrifugation.

Cell Incubation

For over sixty years Eppendorf has been a trusted laboratory partner to researchers worldwide, providing innovative and quality laboratory products and services. As the epitome of laboratory excellence and consistency, Eppendorf CO₂ incubators provide users with exceptional culture control.

Cell Manipulation Instrumentation

Micromanipulators TransferMan® 4r and MicroInjectors, InjectMan® 4, offering unparalleled movement control for Intracytoplasmic Sperm Injection.

06. Protein Analyzers

nephcare 50

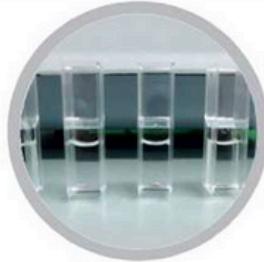

General Features:

- 5.6-INCH COLOR TOUCH SCREEN.
- CALIBRATION BY MAGNETIC CARD.
- 1 OR 4 INDEPENDENT CHANNELS.
- DISPOSABLE CUVETTE, NO CARRYOVER
- SUPPORTS LIS & BARCODE SCANNING
- LESS & EASY MAINTENANCE.

Glycosuria	HbA1c, Cys-C, D-Dimer	Operating Principle	Nephelometry
Renal Functions	CCP, mALB, IgA, IgG, IgM	Light Source	Diode Laser 630-690 nm
Hepatopathy	C3, C4	Throughput range	40 test/hr
Infection	HsCRP, A1AG	Calibration	Magnetic Card System
Rheumatism	CRP, RF, ASO	Cuvette	Disposable Cuvette
		Reaction Time	1.5 - 3 Min Only

Step one

Put stirrer and buffer into cuvette

Step two

Pipette sample into cuvette

Step three

Pipette antiserum into cuvette

07.

Glycohemoglobin Analyzer

- EasyDiagnosis, a public listed company from China, is a leading developer, manufacturer and marketer of In-Vitro Diagnostic (IVD) products, which aims to provide better health for everyone. Today, EasyDiagnosis's innovative and reliable solutions, especially its IVD products like POCT (Point of Care Testing), are distributed worldwide to more than 50 countries.

Automated Glycohemoglobin Analyzer - AH-600 HPLC

 [View Catalogue](#)

Clinical usage of HbA1c

- ① Early screening and diagnosis of diabetes
- ② Effect evaluation of glycemic control for treatment adjustment
- ③ Differential diagnosis between stress hyperglycemia and diabetes
- ④ Prevention, monitoring and evaluation for complications of diabetes

Regular HbA1c measurement:

Once per 6 months for the diabetics with glycemia well controlled;

Once per 3 months for the diabetics with failed glycemia controlled or treatment adjustment needed.

Diagnostic Criteria of Type 2 Diabetes

Standards of Diagnosis	Plasma Glucose & HbA1c
Classic symptoms of high blood sugar	
+ HbA1c	≥6.5 %
or + FPG (Fasting Plasma Glucose)	≥126 mg/dl
or + OGTT (Oral Glucose Tolerance Test)	≥200 mg/dl
If without classic symptoms, each test usually needs to be repeated on a second day to diagnose diabetes.	

Testing should be carried out in a health care setting (such as clinics or hospital lab)

08.

Vacutainer & Vein Finder

- Guangzhou **Improve Medical Instruments Co., Ltd** (referred to as "**Improve Medical**"), established in 1996, is a high-tech enterprise which provides relevant technologies, products and services for Clinical Laboratory and Clinical Nursing.

Pre-analytical System

These sections offer total solution for specimens (Including blood, urine, secretions etc) collection transportation and storage.

Evacuated Blood Collection Tubes

Total solution for BIOBANK

Cryogenic Vial, Box

The cryogenic vial, boxes provide a wealth of choices, suitable for the storage needs of various conventional sample in biological sample libraries.

- 2D CryoMax Vial
- CryoMax Freezing Box
- CryoMax series liquid nitrogen freezing storage box

Vein Finder – Veincas

The VEINCAS – Vein Finder is an astounding, top of the line medical device that enables you to swiftly locate and assess a patient's veins to provide a comfortable and quick venipuncture.

High Tech Laundry System

ECOTEX

- For over 60 years, Ecotex has been a Pioneer in the Design & Manufacture of "Apparel Production" Equipment, Laundry Equipment (Wet & Dry Process Equipment) Storage Equipment, Leather Manufacturing Equipment, Sterilization & Medical Equipments and so on.

Tumble Drier

Designed for Efficiency and Reliability

- The special radiator/ heat exchanger design and efficient blower system makes the drying time of this **Ecotex** dryer the best in its class with lower steam consumption.
- The stainless steel inner basket and heavy duty outer powder coated frame for durability and long life
- Large glass door is provided for ease of loading and unloading linen/garment
- All dryers are provided with a self cleaning lint mesh prior to hot air exit.
- Drive though reduction pulley system with self aligning bearing for smooth and maintains free operation
- The machine is provide with emergency stop button and safety limit switch for the door. Also electrical control panel provided with safety inter lock for the motor.

Programmed for safety

- Programmable micro processor control system comes standard with this machine, also an optional cooling down damper.
- Emergency stop buttons and a safety limit switch is pre installed to ensure safety of the operator and all dryers are provided with a self cleaning lint mesh prior to hot air exit.

Tumble Drier with spray nozzle

- The Spray Mechanism is used to inject a mist of Softener/ Resin/ Chemical into the basket. This is achieved by specialised nozzles and high pressure pumps.

Hydro Extractor

Non-coaxial series & heavy duty

- High capacity and efficient energy consumption. Auto controlled devices, timer and balanced protection brake.
- Overload display, protection device and additional load/unload features make the operation safe and convenient, extending the machine's life span.
- A pneumatic locking system enhances operator safety by ensuring the door doesn't open during basket rotation. This machine is manufactured using a special SG grade single frame casting.

Direct Drive Series

- The inner basket and the outer drum are made of stainless steel and the inner basket is directly mounted on the drive motor.
- The motor is suspended with a coaxial setup along with thermal and anti humidity insulation.
- All the machines have the necessary door lock mechanism and continuous current braking system to assure a simple and safe operation.
- The design provides a quick, self-balancing noiseless and vibration - less performance.

WASHER EXTRACTOR

Inverter Drive

Door Lock

Chemical Box

Touch Screen HMI

Heavy Duty

- An extremely versatile machine (used in hotels, hospitals, dry cleaners and commercial laundry). Its high torque motors and heavy duty invertors ensure high efficiency & low power consumption.

Fully Programmable

- It can store 24 Wash Programs with the LCD showing complete message as opposed to codes. It also has a pause and continue feature useful when there is a power loss.

Shorter Operation Cycle

- To fill & discharge water within minimal time with smooth operation, with soft start & stop that ensures least wear & tear.

Housekeeping Equipment & Chemicals

- Diversey has been, and always will be, a pioneer and facilitator for life. Diversey constantly delivers revolutionary cleaning and hygiene technologies that provides total confidence to professionals across all of their global sectors.

TASKI® ergodisc 165

Low speed single disc machine
- for multiple cleaning tasks

What ergodisc duo is especially suited for?

Wet scrubbing - Stripping - Buffing - Spray cleaning- Shampooing - Wood treatment - Crystallisation - Grinding.

Key Features:

Ergonomics

Simplicity

Safety

Versatility

VACUMAT 22 / 22T

Medium wet vacuum. Flexible hose & floor tool or fixed trolley

- 22L capacity
- Powerful 1000w motor delivers excellent 60L/sec suction.
- Hose & floor tool to reach any space or fixed squeegee options.
- Robust with good chemical compatibility
- Low noise (64 dBA) for minimum disruption

TASKI® swingo 455 B and 455 E

Compact automatic scrubber drier

Key Features:

Versatility in application

Excellent performance

Safety and Simplicity

Reliability & Robustness

TASKI® swingo® 755 E

Cable powered automatic scrubber drier for floor cleaning

Key Features:

Excellent Ergonomics

Unbeatable Cleaning Performance

Increased Productivity and Manoeuvrability

Simplicity and Easy Maintenance

TASKI® swingo® 2100micro

Experience the difference

The TASKI swingo 2100micro represents an evolution in micro ride on scrubber driers. Combining compact design with an unchallenged performance, it offers high flexibility for operations beyond traditional boundaries.

Biomedical Waste Treatment System

- Newster Group is one of the European leaders in manufacturing and marketing certified, patented equipment offering ecological answers to resolve problems related to hospital hygiene with a range of on-site products that are able to satisfy all sanitary needs for waste disposal.

newster. NW5

- Capacity: 15 Kg / hr.
- Automatic cycle, minimal interaction
- Designed for on-site installation up to 150 beds hospital
- Safe storage of sterilized residue for long periods
- Superior than STAATT Level IV microbial inactivation ($6\log_{10}$)

newster. NW5PLUS

- Capacity: 25 – 30Kg /hr.
- Automatic cycle, minimal interaction
- Easy to manage
- Safe storage of sterilized residue for long periods
- Superior than STAATT Level IV microbial inactivation ($6\log_{10}$)

Frictional Heat Technology, upto 150°C

newster. NW50

- Waste treatment capacity: 90-110 kg/hour; 840lt/hour.
- Automatic cycle, minimal interaction.
- Designed for on-site installation up to 600 beds hospitals.
- Easy to manage.
- Safe storage of sterilized residue for long periods.
- Superior to STAATT Level IV microbial inactivation ($6\log_{10}$).

Sewage Water Treatment / Liquid Waste Treatment System

Infectious sewage water treatment

The plant is designed for on-site installation in urban hospitals, hospitals lacking connection to sewerage systems and civil water treatment plants. The disinfection system is particularly dedicated to the wastewater of infectious disease wards, operating theatres, ICU and haemodialysis wards. SWT ensures the mechanical treatment and final chemical disinfection of wastewater without producing harmful compounds, thanks to the use of peracetic acid as disinfectant (sodium hypochlorite or chlorine dioxide can be used too). The plant is completely automatic and does not require continuous supervision.

- 10,000 Litres of wastewater processed every hour
- Automatic operation
- No harmful compounds produced
- No infections spread of in the environment
- Working 24/7

newster. SWT

CSSD Autoclave

- **ShicMed** have a wide range of sterilizers used in different industrials. The company's significant contribution to improvements made across the medical, pharmaceutical and medical waste treatment fields is demonstrated by the quality of its products and services.

B Class Tabletop Autoclave (45 - 80L)

Description

The tabletop high-temperature steam autoclave is a fully automatic high-temperature and high-pressure rapid sterilization equipment using pressure steam as the medium. It is suitable for sterilization of all packaged or unpackaged solid instruments, Class A cavity instruments (dental handpieces, endoscopes), implantable instruments, dressing fabrics, rubber catheters, etc. in medical and health departments such as dentistry, ophthalmology, operating rooms, and supply rooms.

Ethylene Oxide Gas Sterilizer (ETO)

Product Introduction

ETO sterilizer adopts 100% ethylene oxide gas as sterilization medium. It is mainly used to achieve sterilization for precise medical instrument, optical instrument, medical electronic instrument, plastic and medical materials that cannot bear with high temperature and steam sterilization. The EO gas has the performance of strong penetration, reliable sterilization, wide sterilizing spectrum, perfect sterilizing effect which can kill all kinds of virus, spore, microorganism, bacteria and penetrate inside of sterilizing items. No damage or less to the sterilizing items. It is one of the most efficient low temperature sterilization agents.

Features

- * Chamber pressure is always negative in the whole process which ensures EO gas no leakage to outside of working area.
- * Safety EO gas can puncture device and no human intervention need.
- * Door interlock function and it cannot be opened during working
- * Efficient ventilation system. Automatic vacuum ventilation guarantees EO gas exhaust thoroughly.
- * Power off memory function. Once power is off, the sterilization data will be stored automatically and will automatically continue when power is on.

The **Dermablate®** is the state of art **Er:YAG Laser** that has an innovative design and revolutionary technologies in all areas. The system has been developed from scratch, starting from the power adapter, incorporating the cooling, handpieces, user guide and foot pedal. This is innovation "Made in Germany". The Dermablate® is the most modern Er:YAG laser with maximum power and speed. For you, this means highly efficient and gentle treatment.

- Unique Handpiece Port
- Modern & Practical Design
- 360° Mirror Articulated Arm
- Ultra-sharp 10.1 LCD Touchscreen
- Integrated Smoke Extraction
- Flexible Pulse Length

The **NanoStar®** offers a modern design and uses the well-known **Q-Switched technology**. The highest category, the NanoStar® C MT, is a true revolution – thanks to its three wavelengths and innovative mixed technology. The different wavelengths can be used individually, consecutively or simultaneously, ensuring a high degree of flexibility in clinical treatment. This underlines how unique the device is and enables effective treatments.

Boasts adaptive triggering to address challenges with changing patient conditions

NKV-440 VENTILATOR

NKV-550 VENTILATOR

Seamlessly transitions patients between invasive ventilation, non-invasive ventilation, and high-flow oxygen therapy.

Hot-swappable external battery.

HEPA filtered, high-performance internal turbine.

Integrated pneumatic nebulizer and Aerogen nebulizer support.

Modern, intuitive, and customizable application-based (App) user interface.

Seamless transitions between invasive and non-invasive ventilation and high flow oxygen therapy.

Hot-swappable external battery.

Air Compressor based Ventilator System.

Aerogen nebulizer support.

Offers highly customizable screen configurations and an app-based design.

- **Bowin** Medical Co. Ltd. are a high-tech company focusing on modular operation room equipment. They can offer Surgical Light, Examination Light and Operation & Gyn Table. Based on more than twenty years of experience on OR technology R&D, Bowin's well-designed and high-tech equipment got excellent comments and feedback

SURGICAL LIGHTING SYSTEM

World leading patent reflector technology, highly limited blue valve releasing, much better protecting doctors or patient eyes, excellent uniform, shadowless, illustration depth and laminar flow efficiency.

Medical Examination Light

- Complete round light dome
- Multi-facet reflector technology
- Particular Optics Array: 7 groups
- Optimal Cold and Natural LED Lighting with illumination Control
- LED Lifetime over 50,000 hours.

Operation Table

- Stainless Steel Structure with 8cm Slow Rebound Latex Foam Mattress
- Five Section Body Layout
- Electric-Hydraulic System with Smooth Movement & Silent Lifting
- 350mm Table Top Sliding Applicable with Both X-Ray and C-Arm

Operation Table

- Multipurpose Mechanical Hydraulic Ob/Gyn Table to be used in general delivery & gynecology examinations.
- High density memory sponge mattress.
- Rotary brake device easy for moving
- Removable waste basin with flitting membrane

Non-Invasive Neuromodulation

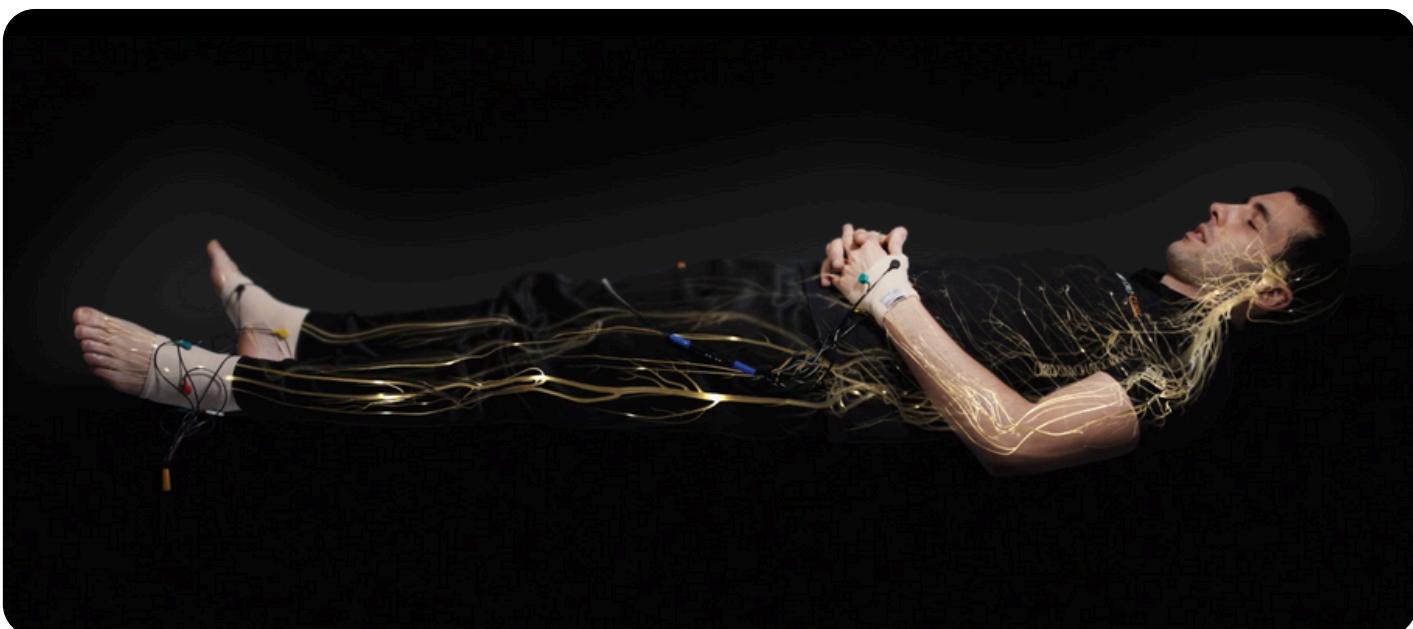

- Over the past 50 years, **NESA WORLD®** has developed a unique technology with more than 20 years of research in bioelectricity and non-invasive neuromodulation. Our pioneering approach has established itself as a benchmark in the treatment of the autonomic nervous system.

- Class IIa and IIb medical device in accordance with MDR 2017/745
- IEC 60601-1 standard for Class BF devices
- Certified under the MDD Directive 93/42/EEC
- Compliant with the European Directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE)
- Aligned with the European Directive 2011/65/EU on the Restriction of Hazardous Substances (RoHS)

NESA® Medical Technology: Non-invasive Neuromodulation

Enhance the management of **chronic pain, sleep disorders, fatigue, overactive bladder, and stress** with the NESA X-SIGNAL® medical device. An effective, fast, and comfortable solution for your patients.
